

Integration / Integrabilità

The system offers various possibilities when it comes to both sound absorption and thermal insulation. Sound-absorbing fabrics and panels can be easily integrated with one another — DresswallStripes adapts to spaces, not vice-versa.

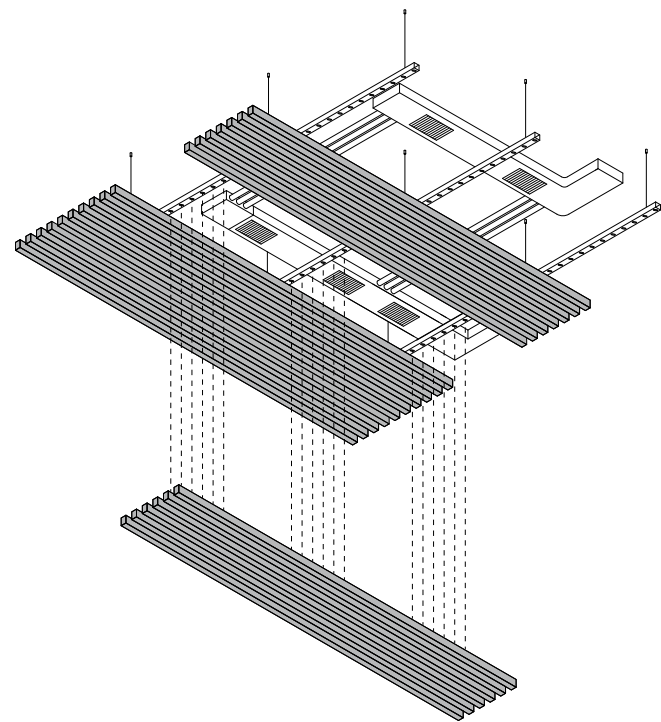

Il sistema offre numerose possibilità di fonoassorbenza e isolamento termico. Tessuti e pannelli fonoassorbenti possono essere integrati — DresswallStripes si adatta alle necessità di uno spazio, non viceversa.

Acoustic absorption value α_w 0,70

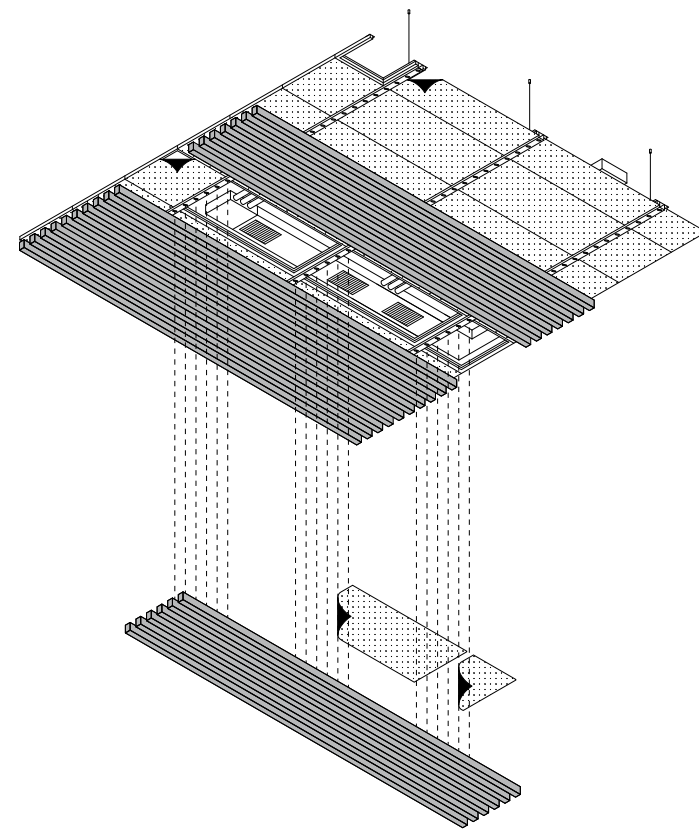

Noise reduction coefficient 0,75

Integration / Integrabilità

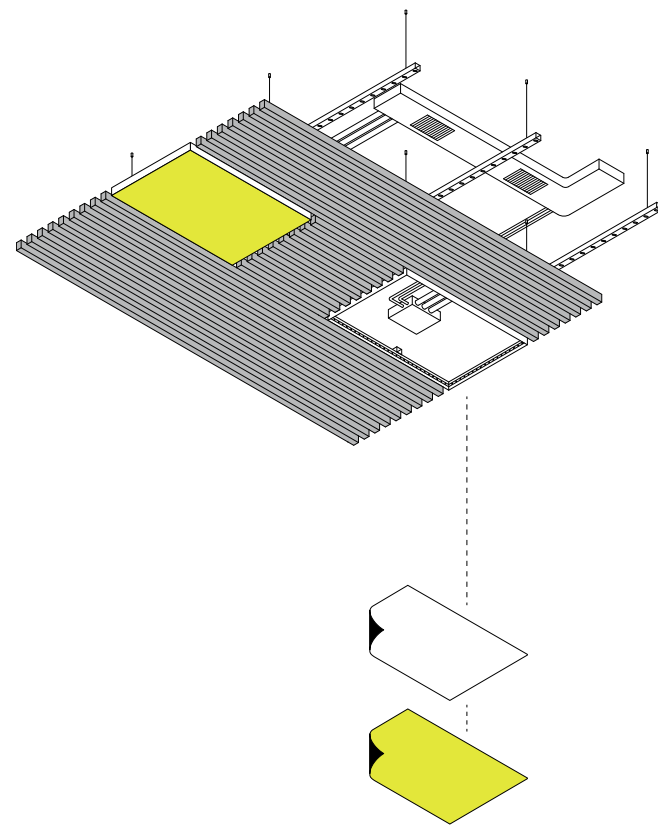

We developed DresswallStripes to be modular, and extremely versatile. When it comes to lighting, the system's modularity opens it up to a wide array of possibilities. A first solution sees non-lighting profiles to be employed seamlessly alongside with light-enabled profiles (e.g., LN8-L). Alternatively, DresswallStripes can welcome other light sources to be built-in, in-between the system's slats.

Abbiamo sviluppato DresswallStripes per essere modulare, ed estremamente versatile. Per quanto riguarda l'illuminazione, la modularità del sistema apre ad un ampio ventaglio di soluzioni. Una prima possibilità vede l'alternazione di profili tradizionali e profili illuminanti (e.g., LN8-L). Alternativamente, DresswallStripes può accogliere altre fonti luminose da installare tra le doghe del sistema.

DresswallLights

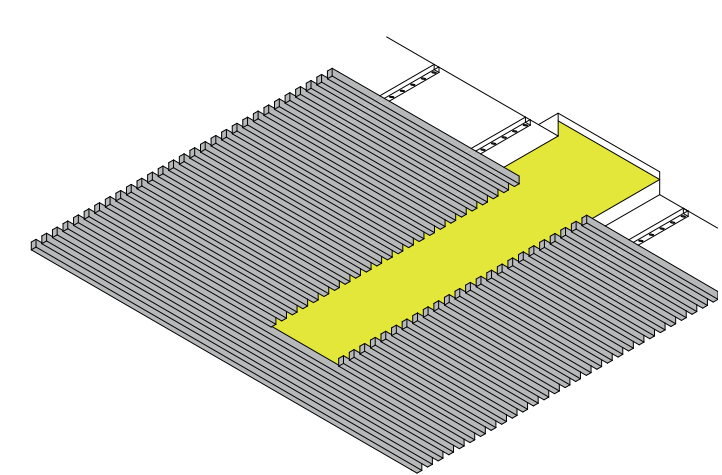

Yet, DresswallStripes versatility isn't limited to these applications. As we designed it to be an element of the Dresswall Ecosystem, DresswallStripes can be integrated seamlessly with DresswallLights, our very own lighting solution. DresswallLights can be installed anywhere alongside a DresswallStripes surface, whether in-line with stripes, suspended or recessed. Get in touch to find the endless customization opportunities of the Dresswall Ecosystem.

Tuttavia, la versatilità di DresswallStripes non si limita a questi ambiti. Abbiamo progettato questo sistema come uno degli elementi dell'Ecosistema Dresswall. Per questo, DresswallStripes può essere integrato fluidamente con DresswallLights, la nostra soluzione per l'illuminazione. DresswallLights può essere installato su qualsiasi superficie DresswallStripes, che sia allineato alla superficie delle doghe, sospeso o incassato. Contattaci per scoprire le infinite possibilità di personalizzazione dell'Ecosistema Dresswall.
